Summary

Data Scientist / AI & Analytics Leader with **5+ years of experience** driving data-driven decision-making across product, marketing, and operations. Proven ability to translate complex data and analytics into actionable business insights, define KPIs, and scale self-service BI platforms. Strong background in SQL, Tableau, Power BI, and advanced Excel, with experience partnering cross-functionally to support strategic and financial goals.

WORK EXPERIENCE

Data Analyst | Knack NY INC | Dallas, TX

Dec 2025 - Current

- Developed **predictive modelling techniques using Python** to forecast **product demand and utilization patterns**, supporting optimized resource allocation and planning, contributing to a **10% lift** in overall retention and optimized product allocation.
- Built and optimized **SQL data models and governed AWS-based data pipelines** (Databricks, S3, Glue, Redshift), improving processing efficiency by **20%**, reducing reporting latency by **30%**, and ensuring strict data governance.
- Led customer experience analytics supporting **product utilization, demand planning, and operational strategy**, translating data into actionable insights that improved member retention by **10%**.
- Owned **KPI definition and reporting** for product performance, utilization trends, and retention metrics, enabling data-driven decision-making for business and operations leaders.
- Designed and delivered **self-service BI dashboards** using **PowerBI**, providing timely visibility into product performance and operational trends.

Data Analyst | KGS Technologies | Dallas, TX

Jul 2024 - Sep 2025

- Developed AI-powered analytics solutions in Python by integrating Large Language Models (LLMs) via **OpenAI APIs and LangChain**, leveraging vector databases and semantic search techniques to analyze structured SQL datasets and unstructured text data (customer feedback, support tickets, logs), enabling faster insight generation and improved decision-making.
- Built and validated predictive models using Python (scikit-learn, pandas, NumPy) for **risk segmentation and forecasting**, improving model accuracy by 15–20% and enhancing business forecasting reliability.
- Designed optimized SQL data pipelines and retrieval layers for **RAG workflows**, evaluating retrieval accuracy and mitigating model hallucination risks to improve retrieval performance and cut manual reporting effort by 40%.

Data Analyst Intern | Proximate Technologies | Dallas, TX

Aug 2023 - Jul 2024

- Performed in-depth analysis to identify underperforming products and product features, contributing to a **12% improvement in product strategy and user engagement through targeted enhancements**.
- Improved **forecasting accuracy by 15%** by leveraging Python and historical consumer behavior data, enabling more effective planning for high-demand products.

Senior Data Analyst | TCS | Bangalore, India

Sep 2018 - Aug 2021

- Built a **forecasting machine learning model** to predict future TV ratings using exploratory analysis to gain marketing insights using historical data, and used **XGBoost and Random Forest algorithms** to train the model and improve the accuracy and precision by 18%.

TECHNICAL SKILLS

- **Programming Languages:** Python, R, Shell scripting
- **Database:** SQL, MySQL, Spark, Hadoop, Kafka
- **AWS:** S3, EFS, EC2, EBS, EKS, Sagemaker, GCP,
- **BI & Visualization:** PowerBI, Tableau, Looker, Excel
- **Statistics & Analytics:** A/B Testing, Forecasting, Regression, Clustering, Classification, Segmentation, Predictive Modeling
- **Certifications:** Databricks ML Model Development, DataBricks Fundamentals

EDUCATION

University of Texas at Dallas | Dallas, Texas

Aug 2021-May 2023

Master's in Information Technology and Management

Visvesvaraya Technological University | Bangalore, India

Aug 2014 - Jul 2018

Bachelor of Engineering in Information Science
